English 

PROFILE

I am a Full Stack Web and App Developer specializing in the MERN stack, TypeScript, and React Native. I create robust, scalable applications, leveraging MongoDB, Express.js, React.js, Node.js, and TypeScript for web development, and React Native for seamless cross-platform mobile apps. My passion for coding and problem-solving drives me to deliver efficient solutions and continuously adopt the latest industry trends.

WORK EXPERIENCE

Full Stack Developer

Anonverse | [LINK](#) 2023

- Led the design and development of frontend and backend systems using React, Node.js, Express.js, and MongoDB.
- Assisted in database design and optimization, resulting in a 99.9% improvement in query efficiency.
- Managed and monitored server infrastructure, ensuring high availability and scalability.

Back End Developer

Bankyl | [LINK](#) 2023

- Developed and maintained RESTful APIs using Node.js, TypeScript and Express.js
- Implemented authentication and authorization mechanisms, enhancing data security.
- Collaborated with the front-end team to ensure seamless integration of frontend and backend components.
- Conducted performance optimization by reducing API response times.

Front End Developer

Imperial-MotherLand | [LINK](#) 2024

- Lead in the design, development, and implementation of the web application
- Attended regular meetings with the back end team to expose weaknesses and problems
- Analyzed project requirements, translating specifications into functional application components.
- Designed user-friendly software to improve accessibility and responsiveness

Front End Developer

Ogavisa | [LINK](#) 2023

- Attended regular meetings with the back end team to expose weaknesses and problems
- Analyzed project requirements, translating specifications into functional application components.
- Designed user-friendly software to improve accessibility and responsiveness
